

RESTAURANT ERP

Berrify user guide

How to use every live screen: sign-in, dashboard, schedule, time clock, employees, inventory, suppliers, movements, and invoices. Screenshots are from the demo workspace (Pacifico Kitchen) on 7 September 2026.

Payroll and Analytics appear in the sidebar as Coming soon. They are not built yet.

Demo password: BerrifyDemo2026!

Manager: demo@berrify.local · Staff: server@berrify.local / cook@berrify.local

Contents

1. Sign in and accounts
2. Finding your way around
3. Dashboard
4. Schedule
5. Time Clock
6. Employees
7. Inventory
8. Suppliers
9. Stock movements
0. Invoices
1. What each role can do

1. Sign in and accounts

What it does

Berrify is a multi-tenant workspace. After you sign in, you work inside one restaurant organization. Your role decides which pages and actions you get.

ROLE	WHO IT IS	EXTRA ACCESS
Staff	Line staff with a linked employee row	Dashboard, Schedule (own published shifts), Time Clock (Clock + Who's working), Inventory, Suppliers, Movements
Manager	Day-to-day operator	Everything staff can do, plus Employees, Invoices, and Time Clock Attendance / Activity / Exceptions
Owner	Workspace owner	Everything a manager can do, plus Time Clock Settings

Staff cannot open Employees or Invoices. Those routes send them back to Schedule or Dashboard.

How to use it

1. Open Berrify and land on Sign in.
2. Enter email and password, then Sign in.
3. Use the eye icon to show or hide the password.
4. Need a new workspace? Click Sign up, enter a restaurant name, email, and password (at least 6 characters). If email confirmation is on, check your inbox before signing in.

Demo buttons fill credentials only. They do not sign you in until you click Sign in.

BUTTON	ACCOUNT	PASSWORD
Fill manager demo	demo@berrify.local	BerrifyDemo2026!
Fill staff demo	server@berrify.local	BerrifyDemo2026!

Important: demo@berrify.local is a manager/owner login and often has no employee row. That person can run the office but cannot punch. Use server@berrify.local or cook@berrify.local to try Clock in / Clock out.

A sign-in card for Berrify Restaurant ERP. At the top is the 'berrify' logo in a dark red font, with 'RESTAURANT ERP' in a smaller, grey font below it. There are two input fields: 'Email' with an envelope icon and 'Password' with a lock icon and a toggle eye icon. Below these is a prominent dark red 'Sign in' button. Underneath are two white buttons with red borders: 'Fill manager demo' and 'Fill staff demo', each preceded by a small person icon. At the bottom, it says 'Need an account? Sign up' with 'Sign up' in red.

Sign-in card: burgundy wordmark, email/password, Sign in, and demo fill buttons.

Joining an existing restaurant (staff)

1. A manager adds you on Employees with the same email you will use to sign up.
2. You create an account with that email.
3. Berrify attaches you to that restaurant as staff instead of creating a second workspace.

Sign out is at the bottom of the left sidebar.

3. Dashboard

What it does

Dashboard is the home screen. It summarizes stock, who is on the clock, invoices waiting for review, and scheduled hours for the current week. It also lists recent activity, today's published shifts (managers) or your next shifts (staff), and items at or below reorder.

How to use it

1. Open Dashboard (first nav item).
2. Read the four cards: Low stock, On clock, Invoices to review, Scheduled hours.
3. Type in Search to filter the recent-activity table.
4. Managers can click New invoice to jump to Invoices.
5. Use the Schedule and Inventory links in the lower cards.

Romaine hearts 6 / 8 case

Salmon fillet 7 / 10 lb

Whole milk 3 / 6 gal

Staff dashboard: same KPIs, but no New invoice and no Employees / Invoices in the sidebar.

4. Schedule

What it does

Schedule is the weekly staff board. Managers draft and publish shifts. Staff only see published shifts assigned to them. Drafts stay hidden from staff. Hours on the board are decimal hours for that week. Overlaps for the same employee are flagged.

How managers use it

- 1. Open Schedule. Use the arrows or This week to change the week.
- 2. Click + Add in a cell, or Add shift, to create a shift.
- 3. Set employee (or Open / unassigned), station, status (Draft or Published), starts/ends, and an optional note.
- 4. A warning appears if that employee already has an overlapping shift.
- 5. Click a shift pill to edit or delete it. Burgundy = published. Gray = draft.
- 6. Click Publish week to publish every remaining draft for the visible week.

5. Time Clock

What it does

Time Clock records live punches. Events are immutable (clock in, start break, end break, clock out). A live session exists only while someone is on the clock. Closed sessions become time entries. Problems become exceptions. The system never invents a clock-out.

You can only punch if your login is linked to an active employee row.

The manager demo often cannot punch. The staff clock screenshot below is `server@berrify.local`.

DATE	CLOCK IN	START BREAK	END BREAK	CLOCK OUT
Sep 6	1:40 PM	1:40 PM	1:40 PM	1:40 PM

Staff Clock tab: Off clock, Clock in as the primary action, and a Recent punches table.

Manager Clock tab: no employee row linked, so punch buttons stay disabled.

Clock

1. Open Time Clock → Clock.
2. Read the status: Off clock, Working / Clocked in, or On break.
3. Use the allowed button only: Off clock → Clock in; Working → Start break or Clock out; On break → End break.
4. Recent punches groups those events into daily rows.

Who's working

Shows people currently Working or On break. Managers can Force out (reason required). Staff see names and state, not punch timestamps.

Who's working empty state: nobody clocked in.

Attendance (manager / owner)

Use this when someone forgot to punch. Pick employee, event, date & time, and a required reason, then Record punch. Derived time entries lists closed sessions.

Time Clock is Phase 1: no PIN pad, no pay period, no payroll export, and no employee timesheet approval.

6. Employees

Managers and owners only. This is the roster: name, station, phone, hourly rate, whether a login is linked, and active/inactive. A roster row can exist before the person has an account. Linked means they signed up with that email. Invite pending means they have not yet.

1. Search the roster by name, email, or station.
2. Add employee: full name, email they will sign up with, phone, station, hourly rate, Active on the roster.
3. Edit changes the same fields. Uncheck Active to block punches and new shifts.
4. Delete removes the roster row after confirm.

Hourly rate is stored for the roster. Berrify does not run payroll from it yet.

The screenshot shows the Berrify web application interface. On the left is a sidebar with the Berrify logo and navigation links under 'OVERVIEW' (Dashboard, Schedule, Time Clock) and 'OPERATIONS' (Employees, Inventory, Invoices, Suppliers, Movements). The 'Employees' link is highlighted. At the bottom of the sidebar, it shows 'demo@berrify.local' and a 'Sign out' button. The main content area is titled 'Employees' for 'Pacifico Kitchen'. It features a search bar labeled 'Search roster...' and a '+ Add employee' button. Below is a table with columns: NAME, POSITION, PHONE, RATE, LOGIN, STATUS, and two action buttons (Edit, Delete). The table contains five rows of employee data, each with a circular avatar icon and status pills for 'Invite pending', 'Linked', and 'Active'.

	NAME	POSITION	PHONE	RATE	LOGIN	STATUS		
EC	Elena Cruz host@pacifico.example	Host	787-555-1003	\$11.00	• Invite pending	• Active	Edit	Delete
LO	Luis Ortega bar@pacifico.example	Bartender	787-555-1004	\$14.00	• Invite pending	• Active	Edit	Delete
MD	Marco Diaz cook@berrify.local	Cook	787-555-1002	\$16.00	• Linked	• Active	Edit	Delete
NV	Nina Velez dish@pacifico.example	Dish	787-555-1005	\$10.00	• Invite pending	• Active	Edit	Delete
SR	Sofia Reyes server@berrify.local	Server	787-555-1001	\$12.00	• Linked	• Active	Edit	Delete

Employees roster with avatars, Linked / Invite pending, and Active pills.

7. Inventory

Inventory is the item catalog and on-hand counts. Status is computed:

STATUS	MEANING
In stock	On hand is above the reorder level
Low stock	On hand is greater than 0 and at or below reorder
Out of stock	On hand is 0 or less

Quantity on an existing item is not edited in the item form. Use Adjust so every change writes a stock movement.

1. Search by name, SKU, or category. Switch All items / Low stock.
2. Add item sets name, SKU, category, unit, unit cost, starting quantity, reorder level, and optional supplier.
3. Adjust records Purchase (add), Usage or Waste (subtract), or Adjustment (signed delta).
4. Check the resulting quantity, then Record movement.

Stock movements: when, item, reason pill, signed delta, and note.

10. Invoices

Managers and owners only. Invoices turns a supplier photo (or WhatsApp forward) into a QuickBooks Desktop Bill on the Expenses tab — not one item line per SKU.

STATUS	MEANING
received	Photo stored; little or nothing extracted
extracted	OCR produced lines and/or a total — needs a human pass
reviewed	You saved the review without exporting
exported	You downloaded IIF or CSV

How to capture a bill

1. Open Invoices.
2. Choose Camera, Upload photo, or WhatsApp (same upload, tagged as a forward).
3. Wait for OCR. One photo can create more than one bill.
4. Filter by restaurant and by All / Extracted / Reviewed / Exported.

Routing (first match wins): WhatsApp group / restaurant flag, mapped sender, caption words such as semilla or kane, then sold-to / ship-to on the factura. Do not rely on CAN ENTERPRISE alone.

Invoices list: Camera / Upload / WhatsApp, restaurant filter, status tabs, vendor avatars, and Review.

How to review and export

1. Click Review.
2. Check the photo, restaurant / QBO books, QuickBooks vendor, ref, dates, and terms.
3. Fix SKU lines (description, shipped qty, amount, category). Jose Santiago bill qty is Desp.
4. Check QuickBooks expenses. Recalc rollout rebuilds the Expenses tab from SKUs + tax.
5. Save review, or Export Desktop IIF / Export CSV (marks the bill exported).

Bill 4128806

Confirm SKUs and the QuickBooks Desktop Expenses tab, then export an IIF bill.

Clock settings	No	No	Yes
Employees	No	Yes	Yes
Inventory, suppliers, movements	Yes	Yes	Yes
Capture / review / export invoices	No	Yes	Yes
Payroll / Analytics	No	No	No

Typical daily paths

Open the floor (staff). Sign in → Time Clock → Clock in → work → Start break / End break → Clock out. Check Schedule for today's published shift.

Open the floor (manager). Dashboard for low stock and coverage → Time Clock → Who's working → Schedule if you still have drafts to publish.

Receive a delivery. Inventory → find the item → Adjust → Purchase → amount → Record movement. Confirm it on Movements.

A supplier texts a factura. Photograph it → Invoices → Review restaurant and expenses → Export Desktop IIF → import in that restaurant's QuickBooks company file.

Someone forgot to clock out. Time Clock → Attendance → Record missing punch, or Exceptions → Reconcile. Berrify will not invent a clock-out.
